(ANSA) - MILANO, 07 MAG - Dopo lo sciopero nazionale della scuola avvenuto ieri con manifestazioni in molte città d'Italia, indetto da Cub Sur, Cobas Scuola, Usb, Unicobas e Cobas Scuola Sardegna, i sindacati di base annunciano che "la mobilitazione durerà a lungo".

"The protest does not stop there – underlines Alfonso Natale, national coordinator of Cub-Sur -. We denounce forgetfulness, omissions, lies and distortions nested in the political choices of the Draghi government. The world of schools is tired of rhetoric and empty promises. we demand an immediate change of course. We must immediately open construction sites in every school to bring them up to standard. We need the immediate stabilization of the precarious workers, the renewal of the contract with substantial salary increases for the staff whose salary has been stopped for too many years, internalisation of outsourced services and the stabilization of Covid staff (teachers and Ata) “.

Cub-Sur calls for “safe schools, that is, more classrooms and staff with fewer students per class and more transport; instead of the Invalsi tests and compulsory PCTs, open teaching, critical and respectful of rights” and again “freedom of movement for teachers newly hired or transferred and the right to in-service training “. “To avoid a resumption of the pandemic – concludes the union – we need valid measures of individual protection and distancing, sanitation and forced ventilation of the environments, protections for students and ‘fragile’ workers”. (HANDLE).
